Pressure Distribution, Orifice, Pipe & Pump Sizing

This design worksheet was developed by the Alberta Onsite Wastewater Management Association.

The completed installation is to comply with Alberta Private Sewage Standard of Practice 2021.

This worksheet is for use in Alberta to: size the orifices in distribution lateral pipes, size effluent delivery piping, and to calculate the required capacity and pressure head capability of the effluent pump.

It can be used for: calculating delivery of effluent to laterals in disposal fields, mounds and sand filters.

This worksheet does NOT consider all of the mandatory requirements of the Standard. It is intended for use by persons having training in the private sewage discipline.

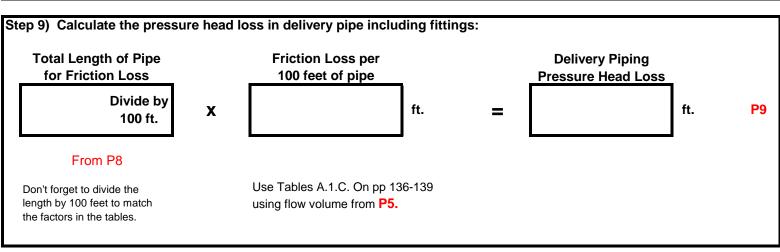

Note: Page numbers refer to the Private Sewage Systems Standard of Practice 2021.

Use only Imperial units of measurement throughout (feet, inches, Imperial gallons, etc...).

Step 1) Select the pressure head to be Minimum pressure at the orifice:				
i wiimimum oressure al me omice	maintained at the orm	ces:		
	2 C 2 E (4) (n 42)			
3/16" or less orifice = 5 ft. Minimum - 2				
larger than 3/16" orifice = 2 ft. Minimu	m - 2.6.2.5 (1) (p 43)			
Design p	oressure at lateral orifices			ft. P1
Note: worksheet will not provide an adequate pressure head and volume of discharge at the	•	•		
elevations.	ornices in each lateral. Addition	iriai considerations must be n	lade for faterals at differing	
Step 2) Select the size of orifice in the	latorale			
Step 2) Select the size of office in the	iaterais.			
		Orifice Diameter		
Minimum size: 2.6.1.5. (1)(e) p. 41	1/8"			in. P2
		selected		
Nata larger eizes ere less likely te plus				
Note: larger sizes are less likely to plug.				
Stan 2) Salast the appains of critical	and datarmina the num	har of arificas to be in	satallad in diatribution la	torolo
Step. 3) Select the spacing of orifices	and determine the num	iber of offices to be if	istalled in distribution la	terais:
Length of Distribution Lateral	Spacing of Orifices s	elected for	Resulting number of o	orificac
		cicotca ioi	Resulting number of t	ornices
